

K' (PRIME) TECHNOLOGIES INC.
Providing Laboratory Solutions

IC Operation & Maintenance One Day Course

Where: Toronto, Building yet to be determined
When: Tuesday, October 26, 2010
8:30-4:00 (including light lunch)
Cost: \$425/person (maximum 10 students per class)

Course outline:

This course will be split between classroom time and hands-on time in front of an instrument. The course will cover the basics of ion chromatography (IC) with information on the modules used including pumps, columns, suppressors, detectors, and autosamplers. The idea being, you can't fix something you don't understand! The second half of the day will involve talking about regular maintenance, and troubleshooting techniques with time spent hands on with the instruments.
